

EuroSys 2017

23-26 April 2017, Belgrade, Serbia
<http://eurosys2017.org>

Call for Papers

The European Conference on Computer Systems (EuroSys) is a premier international forum for presenting computer systems research, broadly construed. EuroSys 2017 seeks papers on all areas of computer systems research, including:

- Cloud computing and datacenter systems
- Database systems and data analytics frameworks
- Operating systems
- Virtualization and virtualized systems
- File and storage systems
- Distributed systems
- Mobile and pervasive systems
- Networked systems
- Dependable systems
- Language support and runtime systems
- Parallelism, concurrency, and multicore systems
- Real-time, embedded, and cyber-physical systems
- Secure systems, privacy, and anonymity-preserving systems
- Tracing, analysis, and transformation of systems

We encourage papers that span different topics and communities. We also welcome experience papers that clearly articulate lessons learned and papers that refute prior published results. Papers will be judged on novelty, significance, correctness, and clarity. Preference will be given to papers with innovative ideas and new approaches over papers with incremental results on well-established problems. Papers will be provisionally accepted and final acceptance will be subject to shepherding by a member of the program committee.

Reviewing will be double-blind, meaning the authors' identities will be hidden from the reviewers. EuroSys applies ACM's policies for plagiarism, submission confidentiality, reviewer anonymity, and prior and concurrent paper submission.

Full submission details will appear online on the conference Web site (<http://eurosys2017.org>). In addition to paper presentations, EuroSys 2017 will have a poster session. Submissions for posters will open closer to the conference deadline. Accepted papers will automatically qualify for the poster session, and authors will be strongly encouraged to participate.

Authors who are unsure whether or not their submissions might meet these guidelines, or with specific questions about the guidelines, are welcome to contact the program committee co-chairs, via eusys17@inf.ethz.ch.

Abstract submission
Full paper submission
Notification to authors

October 14, 2016
October 21, 2016
January 23, 2017

General Chair

Marko Vukolić, IBM Research Zurich

Program Chairs

Gustavo Alonso, ETH Zurich
Ricardo Bianchini, Microsoft Research

Program Committee

Andrea Arpaci-Dusseau, University of Wisconsin
Mahesh Balakrishnan, Yale University
Andrew Baumann, Microsoft Research
Frank Bellosa, Karlsruhe Institute of Technology
Herbert Bos, VU University
Edouard Bugnion, EPFL
Cristian Cadar, Imperial College London
Marco Canini, Catholic University of Louvain
Haibo Chen, Shanghai Jiao Tong University
Shimin Chen, Chinese Academy of Sciences
Byung-Gon Chun, Seoul National University
Fred Douglass, EMC
Pascal Felber, University of Neuchatel
Anja Feldmann, TU Berlin
Paulo Ferreira, University of Lisbon
Christof Fetzer, TU Dresden
Ada Gavrilovska, Georgia Tech
Ioana Giurgiu, IBM Research Zurich
Steven Hand, Google
Tim Harris, Oracle Labs
Valérie Issarny, INRIA
Evangelia Kalyvianaki, City University London
Idit Keidar, Technion
Anne-Marie Kermarrec, INRIA
Christoph Kirsch, University of Salzburg
Dejan Kostić, Royal Institute of Technology
Orran Krieger, Boston University
Jean-Pierre Lozi, University of Nice Sophia Antipolis
Kathryn McKinley, Microsoft Research
Ishai Menache, Microsoft Research
Ippokratis Pandis, Amazon
Marta Patiño, Technical University of Madrid
Raluca Popa, UC Berkeley
Peter Pietzuch, Imperial College London
Mema Roussopoulos, University of Athens
Ant Rowstron, Microsoft Research Cambridge
Marco Serafini, Qatar Computing Research Institute
Dilma da Silva, Texas A&M University
Susan Spence, Hewlett Packard Labs
Neeraj Suri, TU Darmstadt
Dan Tsafir, Technion
Jens Teubner, TU Dortmund
Nalini Venkatasubramanian, UC Irvine
Paulo Verissimo, University of Luxembourg
Roger Wattenhofer, ETH Zurich
Zheng Zhang, NYU Shanghai
Noa Zilberman, University of Cambridge
